

AHMED KHALED AHMED MADBOLY

FullStack .NET Developer

📍 Quesna, Menoufia, Egypt | 📞 +20 111 087 1987 | ✉️ engahmedkhalid3s@gmail.com | 🌐 [Ahmed Khaled](#) | 🐙 [ahmed-khalid2004](#)

Objective

Full Stack .NET Developer with strong **backend** expertise in **ASP.NET Core** and solid **frontend** experience using **Angular**. Passionate about building scalable, secure, and maintainable web applications using clean architecture and modern development practices. Seeking an **internship** or **junior** role where I can contribute to real-world projects, grow technically, and deliver business-driven software solutions.

Experience

Software Engineer Intern

Hassan Allam Holding

September 2025

- Developed a complete **Attendance Management System** from scratch to streamline HR operations and employee tracking

Digital Egypt Pioneers Initiative (DEPI)

Frontend Development Trainee (Angular Track)

Nov 2025 – July 2026

- Working with **HTML, CSS, JavaScript, Angular**, RESTful APIs, and UI/UX principles as part of structured training and projects.

Skills

Programming Languages: C#, C++, Java, JavaScript, Python, SQL

Backend Technologies: ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Entity Framework, LINQ, SignalR, Node.js, Express.js

Databases: Microsoft SQL Server (MSSQL), MongoDB, NoSQL

Architecture & Design: Multi-Layer Architecture, RESTful APIs, Microservices, Design Patterns

Frontend Technologies: HTML5, CSS3, JavaScript, Angular

Tools & Methodologies: Git, Docker, Linux, Cloud Computing, Agile Development, SDLC, Problem-Solving & Debugging

Soft Skills: Team Collaboration, Communication, Leadership, Time Management, Working Under Pressure

Languages: Arabic (Native), English (Good)

Certifications

.NET Development Intensive Training - Route Academy

October 2024 - May 2025

- Mastered advanced .NET development including ASP.NET Core, Entity Framework, and Web API development with industry best practices

.NET Development Track - ITI Menoufia

July 2024 - September 2024

- Completed comprehensive training in C# programming, OOP principles, and advanced C# features (LINQ, async/await, delegates)
- Built full-stack applications using ASP.NET MVC architecture and RESTful Web APIs with Entity Framework ORM

Competitive Programming - Dr. Mostafa Saad (Udemy)

April 2023 - Present

- Enhanced algorithmic thinking and problem-solving skills through C++ programming, data structures, and algorithm optimization

Projects

Attendance Management System

[ahmed-khalid2004/Attendance_system](https://github.com/ahmed-khalid2004/Attendance_system)

ASP.NET Core | Entity Framework | MSSQL | Design Patterns | RESTful API

- Engineered enterprise-grade attendance tracking system serving 100+ employees with real-time data synchronization
- Implemented multi-layer architecture with Repository Pattern and Unit of Work for maintainable and testable codebase
- Designed normalized database schema with optimized indexing, reducing query execution time by 40%
- Built comprehensive RESTful APIs with proper error handling, validation, and API documentation using Swagger
- Integrated JWT-based authentication and role-based authorization for secure access control

E-Commerce RESTful API

[ahmed-khalid2004/E-Commerce_API](https://github.com/ahmed-khalid2004/E-Commerce_API)

ASP.NET Core | Entity Framework | MSSQL | JWT Authentication

- Architected scalable e-commerce backend with product catalog, shopping cart, order processing, and payment integration
- Implemented JWT-based authentication and role-based authorization (Admin, Customer) for secure access management
- Designed normalized database schema with Entity Framework Code-First approach and database migrations
- Created comprehensive API documentation following RESTful best practices and OpenAPI specifications

Company Management System

[ahmed-khalid2004/Company_Management_System](https://github.com/ahmed-khalid2004/Company_Management_System)

ASP.NET MVC | MSSQL | Entity Framework | Bootstrap

- Built full-featured web application for managing company departments, employees, and organizational hierarchy
- Applied MVC architectural pattern with separation of concerns, dependency injection, and service layer architecture
- Implemented complete CRUD operations with server-side validation, error handling, and user-friendly UI
- Utilized Entity Framework for database operations and implemented audit trails for data tracking

Achievements

- **Egyptian Collegiate Programming Contest (ECPC):** Ranked 84th out of more than 300 teams (July 2024)
- **Competitive Programming:** Two-time ECPC participant with 500+ problems solved on [Codeforces](https://codeforces.com/), [LeetCode](https://leetcode.com/), [HackerRank](https://hackerrank.com/), and [VJudge](https://vjudge.net/)

Education

Bachelor of Computer Science

Menoufia University, Menoufia, Egypt

October 2022 - July 2026

- Major: Software Engineering | Current Grade: Very Good
